Dr. Talal Al-Alawi

**Consultant Implant Dentistry
(NYU-USA)**

Your Smile

● Beauty and function ●

Most people are concerned about the appearance of their smile and want to improve their impact. Modern cosmetic dental options can give you the smile you desire... but first things first. Appearance and oral health are inextricably linked. Health pink gum and a strong supporting bone structure are essential before any cosmetic procedure will have the dramatic impact you desire.

Periodontal diseases occur when the number of oral bacteria increases, and the balance tips from harmless bacteria to harmful bacteria. That forms a film called plaque. Without regular brushing and flossing plaque accumulates and transforms to hard tartar.

Brushing, flossing and regular recall appointments are building blocks behind a healthy mouth and an appealing smile. We are always happy to discuss your cosmetic options, but we want you to have a healthy foundation first.

Lasting Impressions

Popular treatments can rally your smile

A dazzling smile can ignite a room. It projects strength, confidence, and beauty. For decades dentists had worked on ways to treat dental problems. We can now change the way your teeth look and the way you feel!

Because your mouth is one of the focal points of your face, it plays a major role in how you perceive yourself and how others perceive you. And now, taking steps to improve your appearance is an investment in your long-term health and well-being.

Here's a glossary of what some of the most popular treatments can do for your smile... apart from making a lasting impression!

- **Whitening** – Erases unappealing stains and discolorations for a brighter, whiter smile.
- **White fillings** – White composite, porcelain, cast glass, or resin inlays and onlays replace silver-colored fillings.
- **Veneers** – Stains and chips, or

overlapping and uneven teeth may require veneers which are extremely thin but strong porcelain shells that are layered over the front surfaces of natural teeth. Veneers can be designed to improve the proportions of your smile.

- **Crowns** – Teeth that have had root canal treatment or extensive restoration can be repaired and strengthened with a crown that fits over a tooth to restore its normal shape, color, and function.
- **Implants** – If your smile is suffering because of missing teeth, implants may be the answer. They can be an esthetically pleasing alternative to dentures and bridges
